

Intraground™ N1 Series Nonmetallic Tumbler Switches

Explosionproof

Enclosures and Covers Have Neutral Color. Non-Factory Sealed. ①

NEC:

Class I, Division 1 and 2, Groups C, D
NEMA 3, 4X, 7CD, 12

Applications

- Listed for use in Class I, Group C and D, Division 1 and 2 atmospheres such as:
 - Diethyl ether
 - Methyl ethyl ketone
 - Acetone
 - Toluene
 - No. 3 fuel oil
 - Ammonium hydroxide (20%)
 - Benzene
 - Regular unleaded gas
 - Ethyl acetate
 - Hexane and methanol
- Not suitable for:
 - Ethylene dichloride
 - Partially halogenated hydrocarbons.
- Sealing fittings must be field installed adjacent to enclosure on all conduit runs. ①
- Explosionproof. With sealing fittings installed at each conduit entrance, the N1 Series enclosures withstood a hydrostatic test of four times the maximum internal explosion pressure that could be developed from a gas or vapor explosion in actual use.

Features

- Nonmetallic construction with metal imbedded grounding grid. No need to install special wires and parts for grounding. Feed-thru or dead-end grounded 1/2" or 3/4" conduit openings for threaded conduit.
- Special grounding wire furnished with each box provides safe grounding when cover is removed.
- Ideal for use in corrosive environments. Nonmetallic enclosures with corrosion resistant parts coated with epoxy, Teflon® ② or Mylar® ②, these switches offer unsurpassed resistance to a wide variety of corrosive chemicals.
- Unique labyrinth-path construction assures flame-tight joint between body and cover.
- Silicone gasket, specially designed for the labyrinth-path joint, prevents entrance of moisture without interfering with the venting of cooled hazardous gases and vapors.
- Typical mechanical properties of 24,500 psi tensile strength, 3% elongation at break, 33,000 psi flexural strength, and 1,200,000 psi flexural modulus.
- Electrical properties of sample specimens: dielectric strength (in air) of 769 at 1/16".
- High strength thermoplastic polyetherimide, together with thick walls (5/16") and sound structural design (rounded corners) provides superior resistance to impact and crushing.
- Excellent resistance to ultraviolet light and water.
- Excellent conduit connection strength.
- Excellent resistance to attack by fungi and mold.
- Excellent heat deflection temperature: sample specimens rated at +210 °C (+410 °F).
- UL Temperature Index (continuous use temperature): +170 °C (+338 °F) electrical properties, +170 °C (+338 °F) mechanical properties with impact.
- Superior flammability resistance.

- Enclosures have external mounting lugs for ease of mounting.
- Smooth, rounded integral bushing in each hub protects conductor insulation.
- 20 Amp and 30 Amp units available for use with 120-277 Vac.
- Corrosion resistant, strong stainless steel Teflon® ② coated hex head cap screws attach cover and body for approved flame-tight construction.
- Operating handle has close-tolerance threaded stainless steel shaft to meet explosionproof requirements. Provides positive corrosion resistant operation.
- Handle may be locked in ON or OFF position.

Standard Materials

- Body and cover: 30% glass-reinforced thermoplastic polyetherimide — neutral color
- Handle: nylon 6/6
- Cover bolts: stainless steel
- Nameplates: aluminum

Standard Finishes

- Cover bolts: Teflon® ②
- Nameplates: Mylar® ②

NEC Certifications and Compliances

- UL Standards: UL 894, UL 1203
- UL Listed: E10523
