

WST and WDS Cast Aluminum Enclosed Disconnect Switches

600 Vac, 600 Vdc, 30, 60, 100 Ampere, Fused and Non-fused.

NEC – WST:
NEMA 3, 3R, 4, 4X, 12

CEC – WDS:
NEMA 3, 4X, 5

Applications

- For heavy duty applications where a heavy duty switch is required for disconnecting motors, lighting, or power circuits.
- The WST and WDS can be used to control power to fixed electrical equipment such as:
 - Welders
 - Generators
 - Compressors
 - Infrared ovens
 - Batch feeders
 - Conveyors
 - Truck terminals
 - Marine docks
- Ideally suited for use in:
 - Automotive and steel processing plants
 - Pulp and paper processing plants
 - Milk processing plants and creameries
 - Fabrication yards and shipyards
 - Refrigerated truck terminals
 - Other industrial plant applications

Features

- Gasketed design allows use in raintight or watertight non-hazardous applications.
- Epoxy powder coated inside and outside to withstand corrosive environments.
- Offers the latest in switch technology:
 - An operating mechanism designed to endure at least three times the number of operations required by NEMA and UL standards
 - Modular componentry designed for quick and easy maintenance
 - Visible blades for an extra measure of safety while the low mass cam allows greater blade operating speed and reduced mechanical wear.
- Insulated, dual-color polymer operating handle clearly indicates the switch being energized. Ergonomically designed handle is made of high-impact polymer material for exceptional ruggedness, durability and corrosion resistance.
- Short circuit withstand rated to 200,000 RMS symmetrical amperes (Class R, J Fusing).
- Class R fusing standard on fusible units. Product can be retrofitted with Class J, K, or S fusing.
- Stainless steel captive cover bolts for easy access and corrosion resistance.
- Removable hinged cover for ease of installation and maintenance.
- Conduit entries are drilled and tapped to 1-1/2". Reducer bushings 1-1/2" – 1-1/4" and 1-1/2" – 1" provided at no extra charge.
- Stainless steel key-hole mounting feet for easy installation.
- Unit is equipped with defeatable door interlock which allows emergency access when switch is energized.
- Cover can be padlocked closed.
- Operating handle can be locked in the OFF position with provision to lock in ON position.
- Not intended for use as a service disconnect (i.e., neutrals not available).

WST

WDS

Standard Materials

- Enclosure: copperfree (4/10 of 1% max.) aluminum
- WST operating handle: high impact polymer
- WDS operating handle: cast aluminum
- Hardware: stainless steel

Standard Finishes

- Enclosure: epoxy powder coating inside and outside

NEC/CEC Certifications and Compliances

- WST:
 - UL Standard: 98
 - UL Listed: E160652
- WDS:
 - CSA Standard: C22.2 Nos. 0.4, 0.5, 4, 25, 94
 - CSA Certified: LR39569

WST Cast Aluminum Enclosed Disconnect Switches

600 Vac, 600 Vdc, 30, 60, 100 Ampere, Fused and Non-fused.
