

## HTC1ASW, Hot Line Tap Connector, Range: #6-4/0, 1/2"-13 Angled Stud, Extra Wide Body

By Burndy  
Catalog # [HTC1ASW](#)

CPI Hotline Tap Connectors, HTC Straight Series, are designed for use as a permanent or temporary connection on aluminum or copper wire. Featuring the wedge principal, the HTC Series tap connectors maximize connecting force on the conductor with a self-maintaining spring wedge connection. Angled tap side allows extra clearance of the tap conductor when using a shotgun stick.

### Features

- Angled tap side allows extra clearance of the tap conductor when using a shotgun stick
- Full-current rated connector for use as an in-line jumper or a device tap
- Increased conductive path and surface contact area between the main and tap line increases current ampacity rating
- Can be installed directly to the main with no need for bail or stirrup
- Stainless steel eye bolt increases strength and corrosion resistance
- High-conductivity grit type corrosion inhibitor is factory applied for ease of installation and longevity while ocnnector is in service
- Remains permanently locked through fault current or power surges

- Horizontal wedge action prevents the conductor from 'sticking' during the removal process
- Easy to remove without damaging cable
