

# BATTERY-POWERED MACHINE SKATES

SAFELY POSITION LOADS OF UP TO 55 TON WITH A SINGLE REMOTE OPERATOR

**11, 33 & 55 ton  
Models**

**EMLS, EMV-SERIES**

**ENERPAC** 

▼ EMLSF25, Battery-Powered Machine Skate

- Position loads of up to 55 tons with this self-propelled solution designed specifically for machine movers
- Single user operation allows you to quickly recoup your initial investment, tackling more projects with fewer resources
- Manoeuvre around tight corners, obstacles and even an incline of up to 3% with the agile dual drive motors and 360-degree tilt swivel saddle
- Runs for 3 hours on a single charge, giving you the potential to move loads over 3940 ft without ever switching out the 24V battery
- Up to 4 x faster than manual methods, travelling at up to 26 feet per minute fully loaded
- Remote control keeps your operator safe by eliminating the need to manually push or pull
- Responsive controls allow precise speed adjustment allowing you to adapt to changing conditions
- Consistent and repeatable performance allow you to reliably estimate project costs ahead of time.

# Battery-Powered Machine Skates

## Battery-Powered Machine Skates

Battery-powered, remote-controlled, heavy-duty machine moving system for clean and even surfaces. Joint transitions not exceeding 3/16 inch difference in height or 1/2 inch in width, maximum 3% grade.

All movements are proportional and precisely controlled via two joysticks on the wireless remote control.

Equipped with cut and abrasion-resistant polyurethane traction wheels and high-quality nylon load wheels.

In combination with a properly rated dual follower skate or skate set, (the load capacity of the undercarriage must correspond to the towing capacity of the drive unit) with the same installation height it forms a safe overall system with 3 load points.

**Safety:** Wireless remote control operation keeps operator at safe distance.

**Steering:** Dual motors and simple controls make tight spaces easier to navigate.

**Transport Speed:** Up to 26.2 ft/min improves productivity so saves money compared to manual methods.

## EMLS, EMV Series

Capacity (Set with Dual Follower Skate):

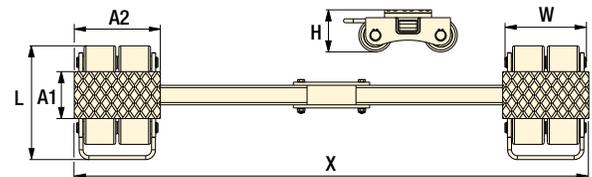

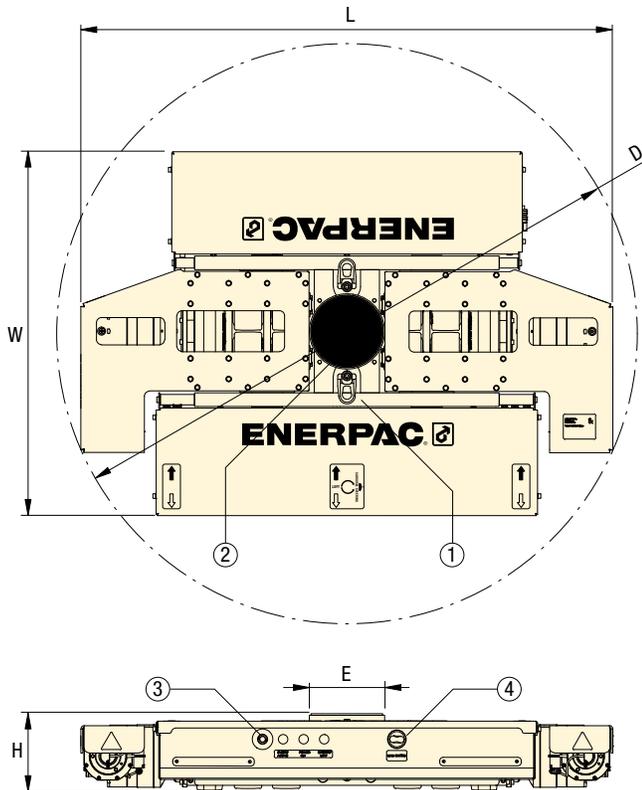

**11 - 33 - 55 tons**

Transport Speed (loaded):

**26 ft/min**

Power Source:

**24 Volt Battery**

# THE RIGHT TOOL MAKES ALL THE DIFFERENCE

Enerpac heavy lifting technology products are put to work under the most intense and demanding conditions. That's why we never compromise. So you can rely on quality and precision every time, giving you the safest and most efficient path to a successful lift.

Enerpac heavy lifting technology combines technical excellence with proven performance – every day, every year, year after year. We believe that customers shouldn't have to compromise – they can rest easy knowing that even in the most complex situations, their reputations and safety are protected by the most trusted products available.
