

## MTP 10 Speed control

Discontinued and replaced with EC-10V (498148)

Item #: 32731

Variant: 10V

This product has been discontinued

The MTP10 potentiometer controls airflow of inline duct fans such as FG..EC, FKD..EC, prioAIR..EC via a stepless signal. The supply voltage is within the range 0 - 12 VDC. The output voltage is adjusted steplessly from 0V to the supply voltage (Us) by a rotary knob.

The potentiometer is equipped with a switch (dry contact) for remote ON / OFF switching of external equipment. Suitable for both for inset (IP44) and surface mounting (IP54).
