

RSK 5 Backdraft Damper

5" Back-draft damper for circular duct, single

Item #: 411113

Fantech's most popular accessory, the backdraft damper, prevents unwanted air from entering through supply/exhaust ports.

- Designed for circular ducts
- Made from galvanized sheet metal for corrosion resistance
- Spring-loaded butterfly blades ensures one-direction flow
- Damper blades formed from aluminum H14
- Stainless steel torsion spring
- 24 GA, G90 galvanized steel casing
- EPBM synthetic rubber gasket
- 3/32" diameter brass central rod

Using a backdraft damper will ensure that air can only flow one way. For the residential setting, this can help the homeowner keep the intended pressure scheme intact. All-in-all, this product makes it harder for non-conditioned, outdoor air to enter the living space through cracks or leaks in the home. This further protects individuals from outdoor pollutants and the reentry of unwanted air.
