

ADC 10 Shut-off Damper w Motor

10" motorized damper for circular ducts, 24V

Item #: [44691](#)

Shut-off damper ADC is a 2-position, motorized damper without end switch. The damper is powered open with 24V AC, and is normally closed with spring return. Power supply wiring is connected to the lead wires attached to the damper motor. Positive closure is provided by a tight seal.
