

VER 100 Fresh Air Appliance

Top duct connection ERV, 105 cfm

Item #: 463235

Variant: 120V 1~ 60Hz

- For condos and 1-2 bedroom apartments or homes
- Removable screw terminal for easy connection
- Compatible with Fantech's low-voltage controls
- Three speed ventilation control
- Washable electrostatic filters
- Anti-microbial material
- Withstands freezing
- AHRI certified

Application

Fantech's VER 100 is a Fresh Air Appliance with energy recovery. It is designed for higher static pressure applications. The appliance provide up to 124 cfm of fresh air.

How it works

The unit brings a continuous supply of fresh air into a home while exhausting an equal amount of contaminated air. The energy recovery core at the center of the unit transfers heat and moisture from incoming air to the outgoing air that was cooled and dried by the building's air conditioner.

Installation

The VER100 is easily installed with the supplied speed bracket.

Note: If you are using the appliance for a simplified installation, i.e. connecting appliance's supply air duct to a furnace's return air duct, the appliance must operate continuously. In case it is turned off, the furnace will continue to draw in outdoor air directly into the furnace without re-heating or re-cooling. If the appliance is installed such that the homeowner may turn it off during the cold or hot seasons, we recommend installing a motorized damper ADC between the appliance's supply air and the furnace's return air duct that closes when the appliance is not operating.
