

Contractor Commissioning Kit

Airflow balancing kit for contractors

Item #: 463311

Buy it once—use it forever: This kit is used to balance all of our Fresh Air appliances.

The Contractor Commissioning Kit comes with:

- Prewired Fantech Control
- CPS Manometer
- Included Tubing
- Installation, Operations, and Maintenance Manual

Contractors, if you're tired of searching through your tool box for loose tubing and your manometer, we hear you! We created this kit just for you to balance all Fantech fresh air appliances. This briefcase style commissioning kit is sleek and lightweight allowing for easy transport from jobsite-to-jobsite.

Some may think of this as an extra cost, but by not paying for an automatic balancing feature on your H/ERV, you'll save money on the initial costs of buying a Fantech fresh air appliance. Also, our quick & simple-to-use balancing procedure only takes a few minutes.

Save your money and your sanity with a Contractor Commissioning Kit.
