

SE 704N Fresh Air Appliance

Side duct connection ERV, 56 cfm, w/o control

Item #: 463801

Variant: 120V 1~ 60Hz

This product has been discontinued

- Airflow up to 67 cfm @ 0.3" PS serves 1-2 bedroom homes
- Anti-microbial material
- Withstands freezing
- AHRI certified (energy recovery core)
- Unit can be installed in any position
- No defrost or drain pan needed
- Optional drain line
- No balancing required

How it works

Fantech's smallest and most compact side duct connection ERV, the SE 704N unit brings a continuous supply of fresh air into a home while exhausting an equal amount of contaminated air. The enthalpic core at the center of the unit transfers heat and moisture from the incoming air to the outgoing air that was cooled and dried by the building's air conditioner.

When it is warm and humid outside and the indoors are cooled and dehumidified already, the ERV pre-cools the fresh incoming air and transfers a portion of the incoming humidity into the exhaust air, reducing the ventilation load. Reducing the load on the homes air conditioner, saves on cooling costs. This unit is designed for warmer, humid climates with longer cooling seasons.

Core, filters and motors can be easily accessed through the latched door. The core conveniently slides out on easy glide core guides.
