

PHS 300 HEPA System

170/240 cfm fan powered HEPA system, portable, on casters

Item #: [463885](#)

The PHS300 portable HEPA filtration system provides area-specific air cleaning by removing pollutants and allergens from the air circulating within the space.

- 2-stage filtration: pre-filter with carbon, HEPA filter
- Captures 99.97% of particles 0.3 microns and larger
- Variable speed operation (170/240 cfm)
- Fully insulated cabinet

The PHS300 is equipped with two specialty types of media air filters that remove pollutants, allergens, odors, and viruses from the air.

The PHS300 portable HEPA filtration system provides area-specific air cleaning by removing pollutants and allergens from the air circulating within the space.

Up to 240 cfm of air is drawn from the area, filtered and returned.

With normal usage, it is recommended to change the pre-filter with carbon (#463046) every 3-6 months and the HEPA filter (463048) once a year. It ensures your ventilation system runs smoothly, and you get the clean indoor air you deserve.
