

FRIK 4x4 Rn Installation Kit

includes two 4" to 4" anti-vibration couplings, manometer

Item #: [95905](#)

FRIK Installation Kit simplifies your Radon fan installation job. The couplers help make a radon active soil depressurization (ASD) system installation quieter by providing superior vibration isolation.

- 2 anti-vibration couplers, U-shaped easy read manometer
- Designed specifically for Radon mitigation applications
- Low Durometer Vibration Isolation
- Coupler's ledge holds the pipe in place
- Coupler's ledge prevents direct pipe-fan contact
- Superior noise vibration isolation
- Soft and flexible material

The kit includes: 2 anti-vibration couplers for 4" PVC pipe fitting, easy read u-shaped manometer (with tubing and 2 self-tap screws), installation instructions, system and component labels, and a system information brochure. FRIK 4x4 is used with Rn1, Rn2, Rn2EC or any industry 4" fans.
