

EFD 20-8, Damper, TFB24

20"x8" Shutter damper with spring-return actuators, 24V

Item #: 99304

Variant: 24V 60Hz

EFD is a shut-off damper. The damper is provided with 24 V motors with spring-return actuators. The EFD conforms to leakage less than 1% of the local design airflow rate at the local maximum static pressure. The outdoor/exhaust air damper prevents the hot water coil from freezing and also prevents the cold air from cooling down the building if the unit stops.

The EFD multi-leaf damper comprises a number of opposed blades, swivelling on nylon bearings in an extruded aluminium framework. The blades are connected via a system of linkages (protected) on the outside of the frame.
