

HOW TO INSTALL SYSTEM

To choose the right length of pipe freeze protection cable, cable should be long enough to run along bottom of horizontal pipes and weather side of vertical pipes (including valves) without crossing or spiraling. Never use a cable longer than the pipe it is intended to protect.

1. Refer to the chart inside or on the package for proper cable selection.
2. Cable will be applied straight along pipe, and will protect pipes up to 1½ inches in diameter.*
3. For pipe lengths other than standard heating cable sizes, and over 1/4 inch in diameter, use two heating cables in parallel on opposite sides of the pipe (see illustration). Maximum "overrun" should not exceed 3 feet. **Do not install on pipe shorter than 3 feet long.****

4. Wrap the entire pipe and cable with insulation. Complete the installation with the weatherproof wrap and the caution signs. For plastic pipe, we recommend wrapping pipe in aluminum foil before installing cable for better heat distribution.

* For pipe diameters greater than 1½ inches, please contact your Frost King representative.

**For details please contact your Frost King representative.

 **WARNING:** Frost King recommends using a **ground fault protected** receptacle.

Electric Heat Cable Pipe Freeze Protection

PRODUCT SELECTION GUIDE

Frost King ITEM #	DESCRIPTION
HC HEATING CABLE / ACCESSORIES	
HC3	3' LENGTH, 21 WATTS
HC6	6' LENGTH, 42 WATTS
HC9	9' LENGTH, 63 WATTS
HC12	12' LENGTH, 84 WATTS
HC18	18' LENGTH, 126 WATTS
HC24	24' LENGTH, 168 WATTS
HC30	30' LENGTH, 210 WATTS
SP41X	25' LENGTH, FIBERGLASS INSULATION
FV15H	15' LENGTH, FOAM & FOIL INSULATION

Frost King products are provided with a **LIMITED WARRANTY**:
See Installation & Operation Instructions or contact
Frost King for complete terms and conditions.

Stop Pipe and Valve Freeze-up

- For Metal and Plastic Water Pipes
- With Energy-saving Thermostat
