

## Antistatic Insulated Wire For Bonding/Grounding, With Dual 1/4-in Terminals, 3 feet.

### Product Images

---

### Short Description

---

- Also used as an extension

## Description

---

Use antistatic wires to prevent sparks from static electricity generated by movement and flow of flammable liquids. During waste collection operations, use one antistatic wire to bond from a safety container to a receiving vessel such as a funnel, then properly ground by attaching a second antistatic wire to the drum and then to an earth ground. Standard wire lengths are 3-foot (1-M) and 10-foot (3-M); for longer reach, use several wires with ¼-in (6-mm) terminal ends. Custom length assemblies are available in 3-foot (1-M) increments.

## Specifications

---

Model No	08506
UPC	697841001862
International Model No.	08506
Material Specifications	Insulated Wire
Net Weight, lbs	0.5
Net Weight, kg	0.2
End Connection 1	0.25 Terminal
End Connection 2	0.25 Terminal
