

Replacement/ Retrofit Label Pack for Hazardous Material Cabinets - 29017

Product Images

Short Description

- Label pack containing Haz-Alert™ Hazardous - Keep Fire Away label and ten application specific labels
- Can be used as needed as replacements

Description

Designed to be compliant with the latest NFPA 1, NFPA 400, and IFC codes for the storage of hazardous materials when used in conjunction with a Justrite steel safety cabinet, this label kit provides an easy way for the user to safely store and segregate incompatible chemicals and avoid potential fire and explosion accidents. Identification of cabinet contents also warns individuals working in close proximity, and first responders, as to the inherent potential dangers if proper precautions are not taken.

Label packages can be used as either a replacement when additional application-specific labels are needed for Justrite's hazardous material cabinets (royal blue), or to retrofit an existing Justrite steel corrosive cabinet (light blue).

Each label package comes with a Haz-Alert™ Hazardous - Keep Fire Away label, as well as a pack of ten application-specific labels to choose from and apply to the cabinet in order to indicate its contents.
