

## Upright Right-Cutting Journeyman Snip

Klein Tools' Upright Snips cut straight, curves, and tight circles in 24 gauge cold rolled steel and 28 gauge stainless steel. This tool makes cutting easier in confined spaces (in ductwork, reaching through openings or against a wall). Soft touch aviation grips provide maximum control and comfort. The blades are made of long-lasting serrated forged steel for superior strength and durability. Tip-Ident® on the handles and color-coding allow for easy identification of the cutting pattern.

### Specifications
