

Ball indenter for Brinell test, 10mm tungsten carbide ball

Item number: 11AAD472

Images

Description

Mitutoyo indenters for Brinell hardness test

As the interface between machine and material, the indenter must be of immaculate quality.

Ball holders are made by **Mitutoyo**, and are supplied without calibration certificate for the included ball.

Please order a ball with **DAkKS** calibration certificate according to **DIN EN ISO 6506-2** and **ASTM E10** separately.

Please contact us if you do not find what you are looking for.
