Description

The EJ-Counter is targeted at secondary and automatic embedded markets as well as conventional measurement rooms.

- Multipoint measuring systems with a maximum of 16 gauges can be configured.
- The EJ-Counter is attached to a DIN rail for use. Due to the small size of the unit, it can be installed inside of switchboards /equipment. When using multiple EJ Counters linked together, connection of power to one EJ Counter also supplies power to the other linked counters.
- In addition, through the industrial I/F unit (sold separately), data can be managed on the upper side, and it is possible to support smart factories such as IoT and M2M.
- Easy setup with the LG QuickSetup Tool software (free of charge) (USB interface is required).
