

## Sensor

Item number: 332-151

### Images

### Description

This edge sensor allows you to make accurate measurements independent of your skill level by automatically detecting edges used in measurements.

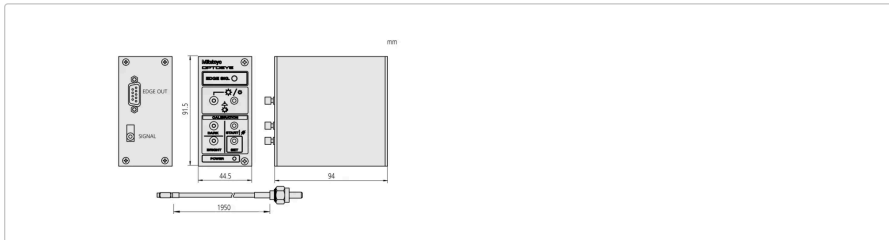

The Optoeye 200 offers you the following benefits:

- OPTOEYE 200 reduces the effect of operator skill level on accuracy by automatically detecting edges used in measurements.
- PJ-H30: You can use the OPTOEYE edge detector on models PJ-H30A (requires adapter plate 12AAG983).
- PV-5110, PJ-3515F and PJ-A14: You can use the OPTOEYE edge detector in combination with the QM-Data 200.
- PJ-PLUS: You can use the OPTOEYE edge detector on models 302-801-10/302-802-10 in combination with the QM-Data 200.
- When you are using the OPTOEYE all projector scales must be connected to QM-Data 200 directly and built-in counters can no longer be used (except PJ-H30D type).

### Features

<b>Model:</b>	OPT-200
<b>Function:</b>	Automatic edge detection
<b>Min. diameter:</b>	2 mm on the screen
<b>Min. width:</b>	1 mm on the screen

### Dimensions

### Accessories

#### Standard accessories:

#### Attachment

OPTOEYE-200 Attachment A, 250-350 mm

Art No. 12AAE671

Suggested retail price: 45.00 €\*  

## Attachment

OPTOEYE-200 Attachment B, 500-600 mm

Art No. 12AAE672

Suggested retail price: **63.00 €\***
