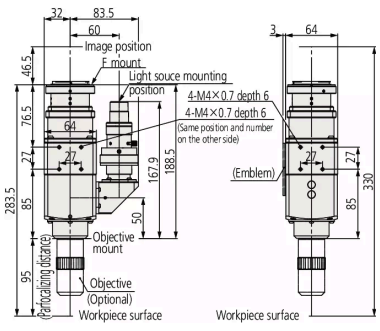
Description

The WIDE VMU series takes video microscopy to the next level with a 7 times bigger field of view than conventional models. It supports both bright field and dark field observation.
The WIDE VMU offers the following benefits:

- Supported sensor size of 2-inch-equivalent, APS-C format
- Image field of ø30 mm with 1X tube lens
- Both F-mount and C-mount cameras can be mounted
- Bright field (BF) observations are supported by the WIDE VMU-V and -H models ,
- Bright field/Dark field (BD) observations are supported by the WIDE VMU-BDV and -BDH models
- With the flexible orientation for camera and illumination mounting very compact arrangements can be configured.
- The objective is optional.

Features

Model:	WIDE VMU-HR
Camera mount:	Vertical
Observation type:	Bright field (BF)
Illumination mount:	Single port
Mass:	1400 g


Dimensions
