

# Gauge Block, Metric, with JCSS Cert.

Item number: 613518-016

## Images

## Description

This Grade K Gauge Block with JCSS Certificate offers you the following benefits:

- Due to the ceramic material, these gauge blocks are highly wear-resistant and corrosion-resistant.
- CERA blocks feature ten times the abrasion resistance of steel gauge blocks and three times that of hard metal blocks.
- Steel and ceramic have similar expansion coefficients which reduce measurement errors that occur due to temperature change.
- Non-magnetic: Powders (such as iron grit) will not adhere to surfaces
- Clearly visible marking: Black characters on a snow-white surface
- More or less free from dimensional change over time
- Can adhere to steel gauge blocks
- Free from burrs caused by scratches

## Features

|                             |  |
|-----------------------------|--|
| <b>Inch-Metric:</b>         | Metric   |
| <b>Length [mm]:</b>         | 1.8  |
| <b>Type of Certificate:</b> | JCSS certificate                                       |
| <b>Delivered:</b>           | In a foamed material with JCSS calibration certificate |
| <b>Accuracy:</b>            | EN ISO 3650  |
| <b>Material:</b>            | Ceramic  |
