

# Gauge Block, Metric, with JCSS Cert.

Item number: 613682-016

## Images

## Description

This Grade K Gauge Block with JCSS Certificate offers you the following benefits:

- Due to the ceramic material, these gauge blocks are highly wear-resistant and corrosion-resistant.
- CERA blocks feature ten times the abrasion resistance of steel gauge blocks and three times that of hard metal blocks.
- Steel and ceramic have similar expansion coefficients which reduce measurement errors that occur due to temperature change.
- Non-magnetic: Powders (such as iron grit) will not adhere to surfaces
- Clearly visible marking: Black characters on a snow-white surface
- More or less free from dimensional change over time
- Can adhere to steel gauge blocks
- Free from burrs caused by scratches

## Features

<b>Inch-Metric:</b>	Metric
<b>Length [mm]:</b>	200
<b>Type of Certificate:</b>	JCSS certificate
<b>Delivered:</b>	In a wooden case with JCSS calibration certificate
<b>Accuracy:</b>	EN ISO 3650
<b>Material:</b>	Ceramic
