

# Switchboard Mat Type 3 MIL-DTL-15562G Compliant 836

## Product Images

## Short Description

---

- Electrically Insulative Type 3 PVC compound
- Fire retardant
- Diamond-plate surface - Added traction
- Each square foot of this matting is tested in conformance with MIL-DTL-15562G specifications
- Class 2 Di-electric Strength: 30,000 volts
- Proof test of 20,000 volts
- Recommended maximum use voltage: 3,000

## Description

---

This heavy-duty matting meets the MIL-DTL-15562G specification for insulating, switchboard matting, and sheet floor covering and is approved for use by the Department of the Navy and all Departments and Agencies of the Department of Defense. This non-conductive floor mat is made from a vinyl compound, designed to provide insulation that prevents the worker from being grounded, thereby eliminating the possibility of electrical shock. Military Switchboard Matting - Type III is fire retardant, and its diamond top surface adds traction. These mats are designed for use around electrical apparatus and circuits in the commercial marine industry as well as the military and avionics.

## Specifications

---

Model No	836
Available Colors	Gray
Overall Thickness	3/16
Roll Sizes	3'x 75'
Custom Lengths	3' widths (up to 75' long)
Group	Ergonomic, Anti-fatigue & Safety Matting
Environment	Dry Areas
Recommended Use	Around electric sub-stations, transformers and switches, electrical panels, engine and generator rooms
Special Remarks	Please consult "Naval Ships Technical Manual, Chapter 634 - Deck Coverings" for specific guidelines for installation of MIL-DTL-15562G, Type I, II, or III switchboard matting.
Surface	Industrial Diamond Plate
Edges	No borders
Usage Intensity	Heavy duty
Material Specifications	PVC (DOP free)
Process	Calendering
Weight Lbs/sqft	1.3
Anti-Fatigue Rating	Good
Slip Resistance Rating	Best
Wear Resistance Rating	Best
