

RELAYS AND TRANSFORMERS

SPEC SHEET

TrueLine™ fan relays and transformers are available in popular configurations to meet the requirements of most service applications. TrueLine products are competitively sourced to offer you the highest quality at the best possible price.

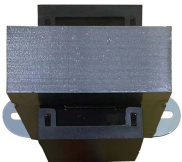

RELAYS

Relays act as a gatekeeper to the flow of electricity to one or more components of an HVAC system. TrueLine fan relays ensure the fan is running when needed, reducing wear and tear on the system and optimizing performance efficiency.

PART NUMBER	TYPE	COIL	REPLACES
42-TLR340	DPDT	24V	90-340
42-TLR370	SPDT	24V	90-370
42-TLR380	NO/NC	24V	90-380

TRANSFORMERS

Transformers increase or decrease the voltage flowing in an electrical circuit. For residential HVAC applications, transformers decrease high voltage of incoming electricity to lower levels suitable for home use.

PART NUMBER	VA	PRIMARY VOLTAGE	SECONDARY VOLTAGE	Hz	WIRED	MOUNT
46-TLT40	40	120, 208, 240	24	50/60	Yes	Foot
46-TLT75	75	120, 208, 240, 480	24	50/60	Yes	Foot
