

Product Overview

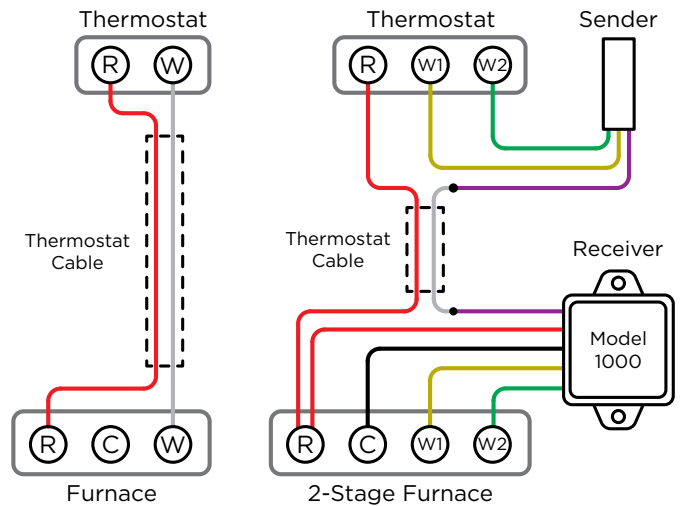

- Add or upgrade HVAC equipment without installing new wires
- Compatible with furnaces, air conditioners, heat pumps, RTU's, and PTAC's that use 24V wiring, as well as equipment that requires dry-contact switching such as boilers and zoned hot water systems
- Six models are available to cover a range of applications, including adding air conditioning to a heat-only system, upgrading to 2-stage heating or cooling, smart thermostats, cable repairs, heat pump retrofits, and more

Each model contains a **Sender** and **Receiver** unit

The Sender is installed at the thermostat. The Receiver is installed at the HVAC equipment. They are connected together through the thermostat cable.

Example: Upgrading to a 2-Stage Furnace

Contractor Benefits

- ✓ Allows for lower cost bids or quotes which increases the bid success rate
- ✓ Easy to install with no programming or training required
- ✓ No batteries needed and has a lifetime warranty
- ✓ Not wireless, FAST-STAT operates over the existing thermostat or condenser cable providing a strong, reliable connection
- ✓ Wiring diagrams available for every application with phone-in or email technical support provided

Wholesaler Benefits

- ✓ An increased bid success rate by your customers will increase sales for high value products such as furnaces, air conditioners, and heat pumps
- ✓ Sales are supported by marketing programs through the leading HVAC industry publications. Point of purchase product literature is also provided without cost
- ✓ All purchases are backed with a "guaranteed sale" in that any FAST-STAT inventory can be returned at any time without incurring restocking fees

The FAST-STAT product line has won three *Dealer Design Awards* in the Residential Controls category. The Dealer Design Awards are judged by a panel of independent HVAC contractors.
