THE POWER OF COMFORT

It's easy to feel more comfortable at home.

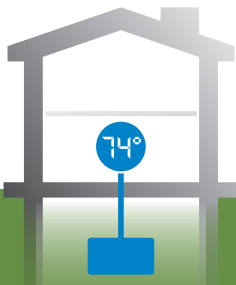

Our products are designed to put you in charge of your comfort in a way that complements your life.

Basic Comfort

Be comfortable in your home with the latest thermostat technology. This solution enables you to control temperature from a single fixed location, but does not always ensure maximum comfort in all rooms.

- ✓ Precise temperature reading

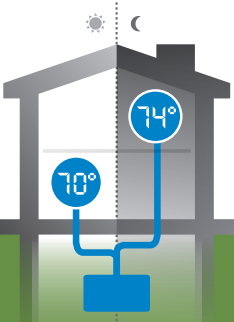

Accurately control temperature from one fixed location in your home

Enhanced Comfort

Enjoy greater comfort with the freedom of remotely controlling temperature throughout your home—so it can be optimized for one room during the day and another at night. This is an affordable solution that improves comfort with the flexibility to control temperature in one location at a time.

- ✓ Precise temperature reading
- ✓ Multiple temperature sensing locations
- ✓ Remote temperature controls
- ✓ Wireless technology

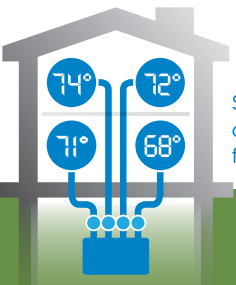

Remotely control temperature throughout your home from one location at a time

Ultimate Comfort

Experience complete control with the ability to control temperature from all locations in your home independently—so that everyone can be comfortable everywhere. This solution minimizes energy consumption by only conditioning rooms that are occupied.

- ✓ Precise temperature reading
- ✓ Multiple temperature sensing locations
- ✓ Remote temperature controls
- ✓ Wireless technology
- ✓ Room-by-room temperature control
- ✓ Single command center for controlling multiple areas

Simultaneously set rooms in each area of your home to different temperatures for optimal control
