

STI THERMOSTAT PROTECTOR

STI-9110

STI-9116

PRODUCT OVERVIEW

Molded of clear polycarbonate material, these protective covers are recommended for areas where abuse to a thermostat exists. This may include vandalism, accidental damage or costly, annoying tampering by employees and guests. Especially useful where thermostats are located in public areas, the covers are easy to install. Holes in the frame allow air to circulate freely for proper operation of protected thermostats or energy sensors. An interior wall on the frame prevents objects from entering and tampering with the protected thermostat.

THREE YEAR GUARANTEE ON COVER

As all STI polycarbonate covers, these tough units are backed by a three year guarantee against breakage in normal use. The Thermostat Protectors are shipped complete with all mounting hardware.

KEY FEATURES

General Information

- Offers excellent protection against tampering, abuse and accidental damage without affecting operation of the thermostat.
- Includes a lock and key assembly (excludes STI-9116).
- Three year guarantee against breakage of polycarbonate in normal use.

Design

- Holes in the frame allow air to circulate freely.
