

Compact Liquid Separator & Filter

LRS Series 3/4" - 6"

Overview

The inlet air, with liquids and particulate that are potentially harmful to the vacuum pump, enters the highly efficient vacuum filter and is separated by an integrated baffle. The larger particles and liquid drop down to the large capacity lower chamber. The lower chamber has significant liquid/slurry holding capacity. The final stage has a replaceable filter element for particulate that is 99+% efficient before it reaches the vacuum pump.

Benefits

- Simplified vacuum package: 2 functions in 1 (liquid separator & inlet air filter)
- Multistage filtration & separation
- Protects pump from harmful liquids that break down lubricating/sealing oil
- Lower cost than individual separator and filter
- Significant liquid/slurry holding capacity
- Prevents emulsification of oil in oil lubricated systems
- Reduce footprint with compact design

Features

- Corrosive resistant blue powder coat carbon steel
- Integrated baffle
- Expansion chamber
- 1/4" inlet/outlet taps (select models)
- 1" NPSC drain and sight port

Technical Specifications

- Vacuum Rating: rough to medium vacuum service
- Filter change out differential: 15-20" H₂O over initial ΔP
- Polyester: 99%+ particulate removal efficiency to 5 micron

Options ATEX Available

- PED, ASME rated vessels
- Stainless steel construction & nonstandard finishes
- Specialty filter media
- Extended bucket for additional holding capacity
- Preseparator stainless steel demister
- Vacuum gauges
- Adjustable support legs
- For larger flows, see our Liquid Knockout Separator Series
