

DAVIT CRANE LIMIT SWITCH

dlhonline.co.uk

Upper Travel Limit Switch For Thern Series Davit Cranes

- Automatic lift limiting device
- For Cranes with Thern Power Winch Operation
- Heavy-Duty Stainless Steel Construction
- Easy Installation
- 2-Year Warranty

FEATURES AND BENEFITS

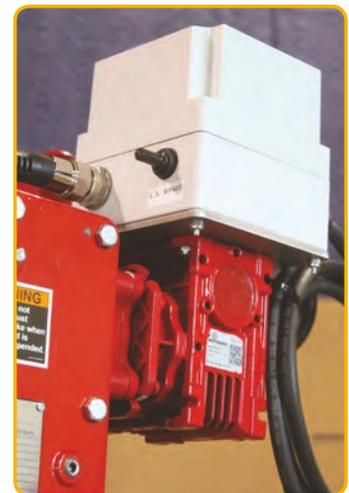

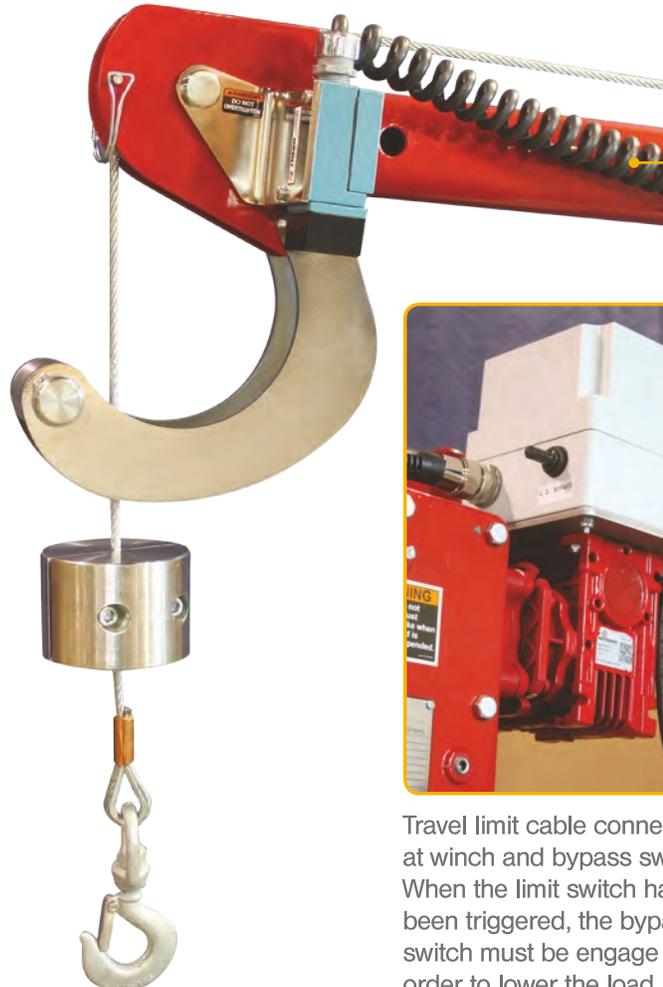

Thern winches and cranes work harder to make your work easier!

Reduce the risk of damaging equipment by using an upper travel limit on your crane.

Now available on most models.

work safer

When the headache ball triggers the upper limit switch, the power winch automatically stops - preventing over travel of the load which could result in damage to the equipment.

Travel limit cable connection at winch and bypass switch. When the limit switch has been triggered, the bypass switch must engage in order to lower the load.

DAVIT CRANE LIMIT SWITCH

Made In USA
Since 1948

WINCH READY

The crane's power winch comes "ready" for limit switch installation. Simply plug-in receptacle and you are all set to go.

POWER WINCH

Model 4WP2-K, Thern Atlas 115 V, AC Single Phase power winch with 6' pendant control.

COILED CORD

The limit switch coil cord adjusts to accommodate the boom position.

CORROSION RESISTANT FINISH

The limit switch components are made of 316 stainless steel to provide the best corrosion resistance available.

HEADACHE BALL

Headache ball is required for limit switch operation. Also keeps cable taut when no load is attached. Red enamel or stainless steel finish options. Sold separately.

WIRE ROPE ASSEMBLY

Available in a variety of lengths in galvanized and stainless steel. Sold separately.

OTHER CONFIGURATIONS AVAILABLE

Limit switch and controls can be configured to operate under extreme temperature conditions. Controls can be equipped with an electronic Amp overload limit - Stopping the winch when an overload is detected.

These products are not for lifting people, or things over people.
